Histograms

Basic Data Presentation Methods

Geo-Spatial

Correlation

Hierarchical

Categorical

Time Series

Distribution

Choosing a Chart Type

Choosing a Chart Type

Bars

Comparing Categories

- Sales by Region
- Time on Site by Page
- Clicks by Ad

Lines

Trends over time

- Sales by Month
- Year over Year Growth
- Page Visits by Day

Choosing a Chart Type

Maps

When geography matters!

- Real Estate
- Oil & Gas Industry
- Public Safety

Scatterplots

Comparing two numbers (measures)

- Sales & Profit
- Order Size & Shipping Duration
- Customer Satisfaction & Age

Choosing a Chart Type

Drill-Downs

When data are hierarchical

- Category > Sub-Category
- Department > Team
- Sales Region > State

Histograms

Looking for what is “normal”

- Home Prices
- Salaries
- Page Load Times

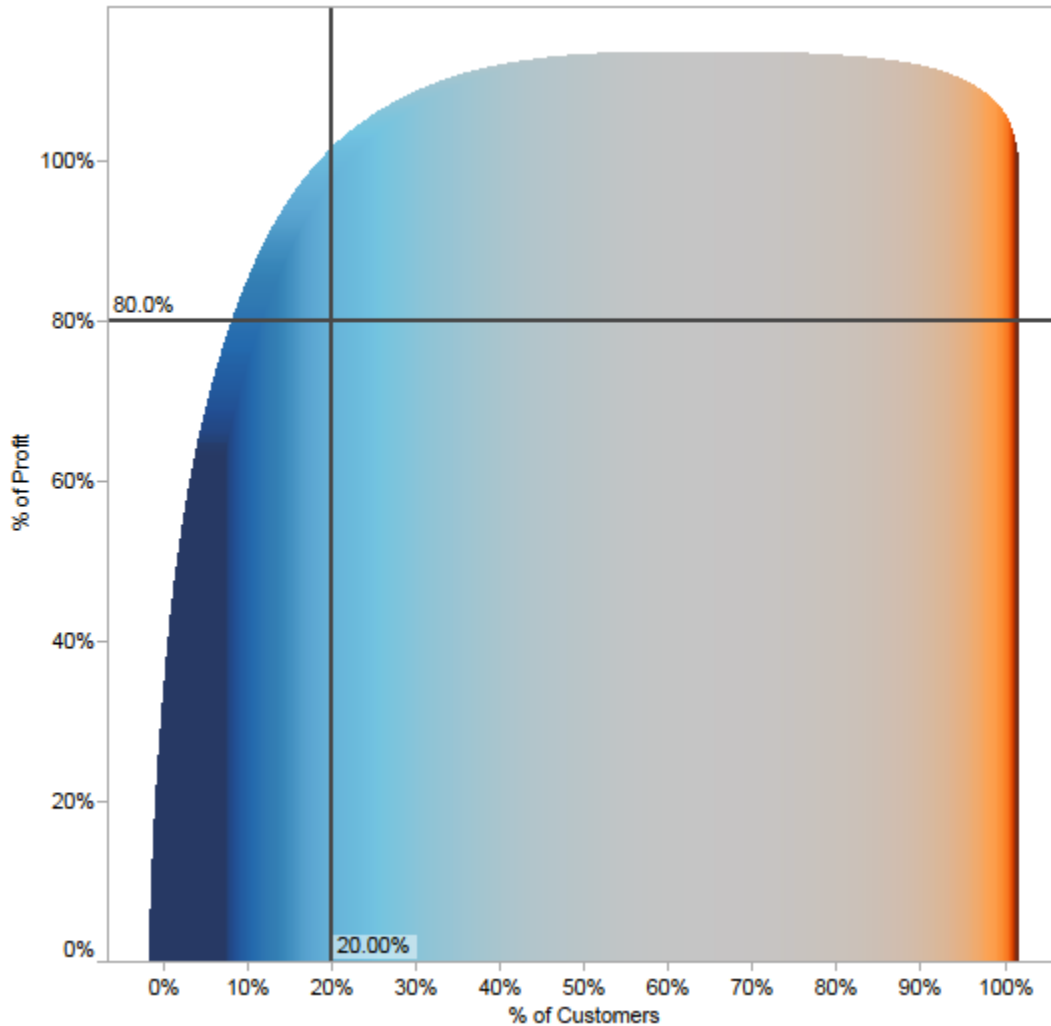

Advanced Chart Types

Box Plot

- Distribution, Percentiles, Median in 1 chart
- Commonly used in Statistics
- Good when wide range of values in data

Pareto Chart

- Visualizes 80/20 rule
- Great for understanding what % of X **is caused by** what % of Y
- ex. 80% of profit come from 20% of our customers

Bullet Graph

- Actuals to Target
- Invented by Stephen Few
- Dark bar is actual, reference line is target
- Optionally color code bar by how close/far from target

Sparkline

- Bite size graphs to be used in sentences
- Shows trends, not actual comparisons
- Great for monitoring dashboards
- Independent Axis for each row
- Does not necessarily start at zero

Heat Map

		Department / Category																										
		Furniture				Office Supplies								Technology														
Customer Segment	Region	Bo	Chai	Offic	rs & e Fu	Tab	Ap	nd	En	Lab	Pa	Su	Ba	Rub	Pens & Art	Scis	Stor	age	Com	Copi	Offic	Tele						
		Bo	Ch	mis	..	Tab	Ap	nd	..	En	Lab	Pa	..	Su	Ba	..	Rul	..	& O	..	Per	nd	..	chi	..	es	..	
Consumer	Central
	East	
	International	
	South	
	West	
Corporate	Central	
	East	
	International	
	South	
	West	
Home Office	Central	
	East	
	International	
	South	
	West	
Small Business	Central	
	East	
	International	
	South	
	West	

- Easily analyze large combinations of dimensions
- Color is everything here
- Great for high-level then allow drill-down

Chart Types to Avoid

Pie Chart

- Angles make for tough comparisons
- Wastes space
- More decorative than informative
- Scale isn't often used
- Often skews results

Polar Area Chart

- Angles make for tough comparisons
- Wastes space
- More decorative than informative
- Scale isn't often used
- Often skews results

img src: <http://datavisualization.ch/showcases/ge-visualizes-the-cost-of-getting-sick/>

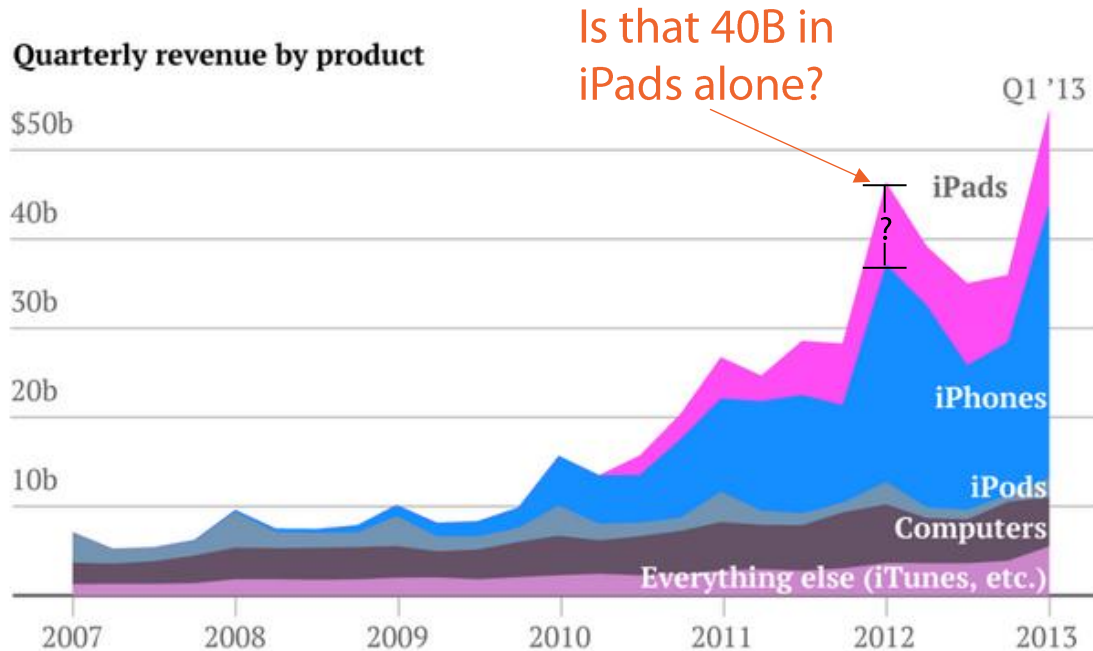

Attentive

Pre-attentive

Stacked Area Charts

- When stacking, makes it impossible to see individual trends
- Only really works w/ 2 or fewer series
- Can skew results
